

A Social-Ecological-Technological Systems (SETS) approach to advancing urban systems science

RCE Greater Atlanta Higher Education Learning Community
Virtual Research Seminar

David M. Iwaniec

Assistant Professor, Urban Studies Institute,
Georgia State University

Friday, September 25, 2020

12:00 Noon - 1:15 PM

Webinar link: <https://bluejeans.com/173050986>

Abstract: This presentation will explore advances in developing a convergent urban systems science capable of co-producing the knowledge and capacities for sustainability transformations and building resilience to climate-driven extreme events. We will discuss a new initiative to develop transformation pathways of climate resilience with Atlanta, New York, Phoenix, and San Juan.

David Iwaniec is an assistant professor of Urban Sustainability at the Urban Studies Institute, Andrew Young School of Policy Studies at Georgia State University. He is a sustainability scientist researching anticipatory and systems approaches to advance urban sustainability, resilience, and justice. His work focuses on the co-development of scenarios and transition pathways for positive futures of urban transformation.
